

Burke-Gilman Trail Redevelopment Study
CAG Meeting November 16, 2004
Project Consultant to King County: Atelier ps

Introductions

Diane Steen - Atelier, Project Manager

Larry Smart & Alex Shkerich - Atelier, Design/technical support

Project Consultant: Atelier ps

What Atelier will provide King County

Based on the project program Atelier's work will identify and document existing trail constraints, opportunities and development issues. They will recommend solutions to address these constraints and development issues. Trail cross sections, based on KC preferred trail sections, will be developed and incorporated with existing site conditions.

At each check in point as noted on the project timeline, Atelier's recommendations will be presented to King County and the City of Lake Forest Park. The County and the City will then jointly present the recommendations to the Citizens Advisory Group for review and recommendation before presentation to the public for final review.

Issues to be addressed by Atelier in the Redevelopment Study

- Environmental Considerations
- Stormwater Drainage, Detention and Water Quality
- Trail Right of Way
- Trail Crossing Plan (Traffic Study)
- Utilities
- Aesthetics and Visual Quality
- Vegetation
- Trail Safety and User Conflicts
- Codes and Permitting
- Site Furnishings
