
Table of Contents

Executive Summary	ES-1
Accomplishments of the CSO Control Program.....	ES-1
Highlights of the CSO Control Program Review.....	ES-2
Maximizing the Use of Existing CSO Control Facilities	ES-3
Identifying the Public and Environmental Health Benefits of Continuing the CSO Control Program	ES-4
Ensuring that Projects Are in Compliance with New Regulatory Requirements and Objectives Such as the Endangered Species Act and the Wastewater Habitat Conservation Plan.....	ES-5
Analyzing Rate Impacts	ES-5
Ensuring the Program Will Honor and Be Consistent With Long-Standing Commitments	ES-6
Assessing Public Opinion.....	ES-6
Integrating the CSO Control Program with Other Water and Sediment Quality Improvement Programs for the Region	ES-7
Next Steps.....	ES-7
Chapter 1 Introduction	1-1
1.1 Why Conduct a Program Review?.....	1-1
1.2 What Are CSOs?.....	1-2
1.3 What Is King County's Role in Wastewater Management?	1-3
1.4 Why Reduce CSOs?.....	1-6
1.4.1 Water Quality Regulations	1-6
1.4.2 CSO Control Regulations	1-7
1.4.3 Sediment Quality Regulations	1-8
1.4.4 Endangered Species Act	1-8
1.4.5 Public Perception and Preferences Regarding CSOs	1-9
1.4.6 Policy Commitments and Agreements	1-9
1.5 What Is King County Doing to Control CSOs?	1-9
Chapter 2 History of CSO Planning.....	2-1
2.1 CSO Planning Prior to the RWSP.....	2-1
2.2 CSO Planning in the RWSP.....	2-2
2.3 Post-RWSP CSO Plan Updates and Program Reviews	2-6
2.3.1 2000 CSO Plan Update.....	2-6
2.3.2 CSO Program Review	2-7
2.3.3 Future Updates and Program Reviews	2-7
2.4 Additional Planning and Environmental Review.....	2-8
Chapter 3 Progress Toward CSO Control.....	3-1
3.1 Measuring Progress in CSO Control.....	3-1
3.1.1 Defining an Overflow Event	3-2
3.1.2 CSO Monitoring and Modeling.....	3-3
3.1.3 Approach to Modeling.....	3-6
3.2 Approach to CSO Control.....	3-6
3.2.1 Pollution Prevention and Source Control	3-7

Table of Contents

3.2.2	System-Wide Operational Controls.....	3-8
3.2.3	CSO Control Projects	3-9
3.3	Implementation of EPA CSO Control Regulation	3-14
3.3.1	Nine Minimum Controls	3-15
3.3.2	Long-Term Control Plan	3-15
Chapter 4	CSO Control Program Review.....	4-1
4.1	Maximizing the Use of Existing CSO Control Facilities.....	4-1
4.1.1	Inspections of CSO Facilities and Rain Gauges	4-2
4.1.2	Review of Monitoring Data and Status of CSO Control	4-3
4.2	Identifying the Public and Environmental Health Benefits of Continuing the CSO Control Program	4-3
4.2.1	Summary of Public and Environmental Health Information and its Relation to CSO Control	4-4
4.2.2	Description of Recent Studies and Activities Relating to Public and Environmental Health.....	4-5
4.3	Ensuring that Projects Are in Compliance with New Regulatory Requirements and Objectives Such as the Endangered Species Act and the Wastewater Habitat Conservation Plan	4-13
4.3.1	Compliance with Endangered Species Act.....	4-14
4.3.2	Use-Based Water Quality Standards	4-15
4.3.3	Water Quality-Based NPDES Permitting	4-15
4.4	Analyzing Rate Impacts	4-16
4.4.1	Cost Estimating for CSO Control Projects	4-17
4.4.2	Evaluation of CSO Treatment Technologies.....	4-17
4.5	Ensuring the Program Will Honor and Be Consistent With Long-Standing Commitments	4-19
4.6	Assessing Public Opinion	4-20
4.6.1	Stakeholder Committee for the CSO Water Quality Assessment	4-20
4.6.2	RWSP Public Involvement Activities	4-21
4.7	Integrating the CSO Control Program with Other Water and Sediment Quality Improvement Programs for the Region	4-22
Chapter 5	Next Steps.....	5-1

List of Tables

Table 2-1. CSO Projects in Order of Priority in RWSP.....	2-5
Table 3-1. Annual Average Number and Volume of Untreated CSOs: Monitored CSOs Compared to Modeled CSOs	3-4
Table 3-2. Completed CSO Control Projects.....	3-10
Table 3-3. Completed Associated Projects	3-11
Table 3-4. King County's Compliance with EPA's Nine Minimum Controls	3-15

List of Figures

Figure ES-1. CSO Reduction Since 1988	ES-2
Figure 1-1. Combined and Separated Wastewater Conveyance Systems	1-2
Figure 1-2. King County Wastewater Service Area and System	1-4
Figure 1-3. King County and City of Seattle Combined Sewer Overflow Locations.....	1-5
Figure 1-4. Reduction in CSO Volumes Over Time.....	1-10
Figure 2-1. Past and Future CSO Control Planning	2-1
Figure 2-2. Priority of CSO Projects.....	2-4
Figure 3-1. Annual CSO Volumes Relative to Total Rainfall	3-1
Figure 3-2. Defining CSO Events Using a 24-Hour Inter-Event Interval.....	3-2
Figure 3-3. CSO Reduction Since 1988.....	3-7
Figure 4-1. Major Water Bodies in King County WRIs	4-7
Figure 4-2. Time Series of Green River Chinook Salmon Returning to the Spawning Grounds and to the Hatcheries, 1968–1997	4-8
Figure 4-3. Presence of Duwamish River Chinook During CSO Discharge— Monthly Average Volume, 1999–2004	4-9

Appendices

Appendix A. RWSP CSO Planning Assumptions, Policies, and Implementation
Appendix B. Description of Models Used for Metro/King County CSO Planning
Appendix C. CSO Control Program Review Detail
